Testimonial Letter for Attack Countermeasures Training (ACT):

Student safety is a top priority for administrators. It's the core reason we selected Attack Countermeasures Training (ACT) for our building leadership. ACT is a comprehensive program that guides the learner through trends, prevention, preparedness, response, and finally, last resort survival. The hands on approach to response and last resort survival are a mindset shift for most, if not all, educators. The shift is a call to action for proactive response rather than waiting in hope for first responders to arrive during the critical time gap. The survival options taught by Alon Stivi are practical, common sense approaches that can be learned by anyone. I highly recommend this program to school administrators and educators as part of their emergency planning and security upgrades. As Alon states very clearly, "dying is not an option."

A handwritten signature in black ink, appearing to read "Robert A. Reed Jr.", written in a cursive style.
